

60 cm Built-in Panel Ready Dishwasher, Sliding Door Heritage-serien

SEK 13.495

DW60S3IAPSC

This Bertazzoni 60 cm fully integrated dishwasher is large enough for up to 16 place settings on three racks. Touch controls with LED display let you access 9 programmes from Eco to Self-cleaning, with 6 functions. It's insulated to keep noise levels at a low 43db. Automatic door opening at the end of the washing cycle speeds up the drying process.

The dual pump system, featuring a brushless inverter motor and a turbidity sensor, ensures exceptional cleaning performance while optimizing energy efficiency. Designed with precision, this advanced technology guarantees outstanding results for every load.

The stainless steel tub is exceptionally durable and resistant to corrosion. Its design enhances heat retention, ensuring superior washing and drying efficiency with every use.

This dishwasher model is equipped with six fixing points, including two on each side and two on the top, ensuring a stable and precise installation. It also features a Side Projection Status Light that discreetly updates the wash cycle status with a sideways beam, avoiding any interference with the kitchen plinth.

It is A energy rated.
