

60cm Electric Built-in Oven, TFT display, total steam Professional Series

F6011PROVTX

This Bertazzoni Professional Series 60cm built-in electric oven with Total Steam offers a best-in-class cavity capacity of 76 litres. With 11 functions it is ideal for mid-to low- temperature cooking, such as baking or recipes that require slow cooking, like casseroles. The non-convection mode is excellent for baking cakes, while the fan-assisted mode ensures even heat distribution on all five levels for roasting and baking with no flavour crossover. The infrared grill gives powerful searing and grilling over a large surface area. The oven is easy to control and monitor with metal or metal titanium knobs and a clear TFT display, which offers remarkable flexibility when choosing cooking modes. It also makes managing the food probe and Bertazzoni Assistant simple. The soft open-and-close door with metal or metal titanium handle is easy to use and the cool touch glass is quadruple-glazed for safety and efficiency. The Total Steam oven helps you create fast and healthy meals, using water vapour to seal in both flavour, nutrients, vitamins and minerals. This makes cooking vegetables, fish and meats quick and efficient. A removable water tank lets you remove and refill without interrupting the cooking programme. Available in stainless steel and black.

Specifications

Features

Oven cavity

Size	60 cm
